Community Futures Peterborough Offers Support for Business Clients Impacted by the Coronavirus COVID-19

As COVID-19 continues to impact Canadians and area business customers, Community Futures Peterborough is taking steps to support their clients during this time by offering an option to defer their April 2020 loan payment.

“We are experiencing an uncertain time and want our clients to know we are here to support their business,” says Grant Seabrooke, Vice-Chair of Community Futures Board of Directors. “Our priority is to ensure our clients know we are here to help.”

Community Futures Peterborough currently has 147 clients with over 9 million dollars invested in community businesses.

“We are continuing to work with our TeamPTBO partners on developing assistance wherever possible,” says Gail Moorhouse, Executive Director of Community Futures Peterborough. “The opportunity to postpone the April payment is one option we hope offers some comfort to our clients during this time.”

The Board of Directors has met and is continuing to closely review the situation and is prepared to offer future relief as required.

Business clients of Community Futures Peterborough will be contacted via email and will have the opportunity to opt-in to the deferral program. There is no negative impact to the businesses credit score for those who select to postpone their payment.
