

#1-My vision for the city of Peterborough is to bring it back to its golden years where job opportunities were plentiful, young people could afford a home and raise their families in the best place in Canada to live.

#2-I think the building of a strong workforce starts in high school where Guidance Counsellors give the student all of the information they need to make a decision about potential job careers and opportunities.

#3-The city is in the process of making an application to the federal government to secure funding to build as much RGI(Rent Geared to Income Housing)as physically and financially possible.

#4-The city's Official Plan lays out the blueprint for that. Also we have invested heavily in GreenTech Commons.

#5-All of the time I have been on council we have always included our First Nations Community in our decision making process and will continue to do so.

#6-I Believe that the new mayor elect should put a task force together to deal with housing,homelessness,addictions and the opioid crisis

.#7-Peterborough Transit needs to be reassessed in how we are going to move people around the city and we need to repair as many roads as financially possible

#8-City Council needs to meet with our MP to get the Federal Government to either repeal or make Bill C-75 more user friendly for the police.

#9-The city has put in place Climate Change Bylaws to reduce GHG BY 50%IN 2030 AND Zero by 2050.We also have a new retro fit Program that will reduce GHG in our homes as well as fostering employment in this sector by 2024.

#10-a:There needs to be a campaign to keep shoppers shopping in Peterborough

B:Clean up the downtown to make Peterborough the Queen City of the Kawartha.

C:The mayor elect needs to create a business table where local businesses discuss their needs.

Keith Riel.
